He develops with a high level of investment expertise investment solutions with high, risk-adjusted economic viability. For the branches in Munich, Zurich and/or London we look for

Product Manager m/f Infrastructure Investments

Your role and responsibilities

As a product manager for infrastructure funds with high real asset and product structure competence, you are the counterpart for all internal and external interfaces with the following tasks

- Contact person for all product information inquiries, including tax and regulatory matters, to internal sales teams and customers
- Create and/or assist in creating legally binding documents and memos for products
- Provide effective communication and regular status reporting to key stakeholders as required
- Supporting sales team by due diligence processes of potential distributors or investors and carry out trainings
- Manage product work streams and all associated activities to create, support and maintain implementation of product initiatives after the initiation phase through to post implementation review

Your experiences

- 5-10 years' experience in product management or similar roles for real assets with a deep understanding for real asset investments / product structures (e.g. GmbH & Co. KG, SICAV, AIF)
- Experience/understanding of multiple jurisdictions and legal structures
- Fluent in German and English, French or Spanish would be an advantage
- Advance knowledge of Microsoft Office including Excel, PowerPoint

Your personality

- Self-disciplined and able to work independently showing initiative and problem solving skills
- Strong interpersonal skills, comfortable working with a wide audience varying in degrees of seniority
- Excellent written and verbal communication skills
- Strong risk awareness and ability to apply critical thinking
